

Canadian Holocaust

Several letters have been written to the editor commenting on the Show the Truth presentation at local high schools.

Some remarks compared the abortion issue to Hitler's Holocaust?

I am not sure if these students are aware that they live in a country that has created its own Holocaust since 1969. (Holocaust according to Webster's Dictionary is "a greater slaughter or sacrifice of life.")

Between 1970 and 1998 Canada has sanctioned the deaths of 2,165,050 babies awaiting birth. I hope some of the students who saw those pictures will ask their parents if they knew this and what they are doing about it?

Those pictures displayed at the schools were from real live victims of our present day Holocaust. Fifty years from now there is the possibility that these same students who viewed those pictures will be asked these same questions by their children and grandchildren.

They may say: Mom and Dad, you were there. Did you know about the Canadian Holocaust that took place? What did you do about it?

I hope all these students will proudly be able to answer this question with: Yes, I did! Yes, I tried to stop it!
